Stop Breathing

The Stereo

your heart stopped beating on it's own
forget that girl
your lungs stopped breathing on their own
forget that girl
your eyes can't see behind your truth
forget that girl
and your mind can't think, so what's the use
forget that girl
it's a lame excuse for being rude
an all out snotty attitude
no rhyme, no reason, no remorse
forget that girl
no matter which you think is worse
forget that girl
this might hurt now, but give it time
forget that girl
take that first step and you'll be fine
forget that girl
if you end up safe home tonight
you might have finally got it right
sound off, take a stand
sound off, baby, while you can
sound off, safe at home
sound off, maybe, i don't know
sound off, no one knew
sound off, baby, where are you?
you don't really mean it, do you know?
forget that girl
and you might believe it, but can you show?
forget that girl
it's the easy way of giving up
a real fast way to lose, then what?
your heart stopped beating on it's own
forget that girl
your lungs stopped breathing on their own
forget that girl
