Owls (are Watching)

Funeral For A Friend

Open windows above the sill, flowers bloom to make the air less chilled
Condescending statements of people in their cars
Waiting for the radio to save their lives, are you watching
Tell me are you watching, are you listening at all?

If it's better protected
The sights unseen
Dark skies surround you
Whatever that means

And there's a light on and no one's home
Tell me did you leave the light on?
There's a light on and no-one is home
Tell me did you leave the light on?

Owls in the night skies watching us pass by
Like ships in the night, covered in silver light
Owls in the night skies watching us pass by
Like ships in the night, covered in silver light

Are they waiting to take it away from me?
Eyes burn like matches and gasoline

And there's a light on and no-one's home
Tell me did you leave the light on?
There's a light on and no-one is home
Tell me did you leave the light on?

Owls in the night skies watching us pass by
Like ships in the night, covered in silver light
Owls in the night skies watching us pass by
Like ships in the night, covered in silver light

Owls in the night skies watching us pass by
Like ships in the night, covered in silver light
Waiting for the radio to save our lives, are you watching
Tell me are you watching, are you listening at all?
