

Jodie (judy)

Marty Robbins

You came down out of heaven to make me happy dear
To smile away my sorrows and kiss away my tears
Seems that I have loved you though we've never met before
But now you're in my heart love to stay forever more
You're my angel Judy you're my darling
You're the sweetest flower at heaven ever grew
My arms could never hold another cause my love is only for you
[steel]
The nights were dark and lonely the days were lonely too
But now they're oh so bright love cause all I see is you
You came into my heart love from out of into space
The song upon your lips dear the smile upon your face
You're my angel Judy...
