Starlight

Anna O'Byrne

Twilight is fading, the air's still and clear
Softly, gently, and night sky appears
Deep in the shadow, here on my own
I long for the day when i won't be alone
And look to the heavens to comfort and guide me

Oh starlight, shine bright, light up the sky to night.
Inspire me from above.
To give me hope of finding love

I dream someone's there for me, could it be true.
that someone, somewhere, dreams of me too
and far in the distance.
I imagine he's there
patiently waiting for the love we will share
I wish I could leave all the heartaches behind me.

Oh starlight, shine bright, light up the sky to night
with magic from above
To help me find my one true love

I look to the night sky to comfort and guide me

Oh starlight, shine bright, light up the sky to night.
Inspire me from above
To give me hope of finding love.

Bring magic from above to help me find my one true love,
Starlight-
