

# **...As Long As Winds Will Blow...**

## **Falkenbach**

... As long as winds will blow

    My pride will be

    And a star will shine

>From far away.....As long as winds will blow

    My pride will be

    And hate remains

Inside my heartAt night a star did shine upon

    What once was build on my ancestors' land

    When once I was young

    Willing to learn

>From the old and the wise...As long as winds will blow

    My pride will be

    And hate remains

Inside my heartEvening fell unto this land

    That once was build by my ancestors' hand

    When I was young

Willing to fight...for as long as the winds will blow...
