Lonely Road

The Red Jumpsuit Apparatus

Lonely road, we gotta walk it just a little bit farther
Heavens knows it can't get any harder than it is today
Lonely road, it's not ahead but is it getting farther
Heaven knows it can't get any darker than it is today
Who do you miss in times like this
When your thoughts are filled with sadness and regrets?
To who do you pray when you've lost your way
And you've such a heavy load?
Let me walk with you upon this lonely road
Lonely road, empty kitchen and a brand new feeling
Nothing's moving but my heart is reeling since you went away
Lonely road, gotta walk it till I start forgiving
Find another way to go on living without you today
Who do you miss in times like this

When your thoughts are filled with sadness and regrets?

To who do you pray when you've lost your way
And you've such a heavy load?

Let me walk with you upon this lonely road

Lonely road, you gotta walk it till the thought astounds you

And you look and find that all around you, people walk with you

Lovely road, you gotta walk it till you won't forget it

That the point is never where you're headed

It's what you're going through

Who do you miss in times like this

When your thoughts are filled with sadness and regrets?

To who do you pray when you've lost your way

And you've such a heavy load?

Let me walk with you upon this lonely road, road
