Moon Song

Doctor And The Medics

Hold me close
I hate you the most
When you are the only one
(Never could) forgotten one
I can hear you dear
I wish that I was never born
When you are the only oneYou come to me
(Thoughts and) I can't see
You're never real, you're pretend to me
When I'm with you
I don't know what to do
Don't come back soon, I don't want you to
When you are the only oneHold my hand
But understand
You are the hated one
And you are the only one
You can look
And you can touch
That's why it's never fun
When you are the only oneIf they could see
What you have done to me
You will not be the only one
You come back soon
Breaking up the room
And soon you'll be the forgotten one
And to her the only one
Only one
Now you'll be forgotten one
