The Beast Cures the Lover

The Wannadies

Here I am with luberon
-my best friend
My thoughts are spinning in and out of my empty head
So is this our new world with too many people set to explode?
Well that's what I've heardHere I am trying so hard to express myself
My eyes are wide open but my mouth is shut
So please...let me believe that you're my desireIf you can, come with me
The beast cures the lover
Come with me, close your eyes
The beast cures the loverHere I am trying hard to be understood
Some say "surrender", but I've already lost
So please...let me believe that you're my desire
You're my desire
