

# The Beast Cures the Lover

## The Wannadies

Here I am with luberon

-my best friend

My thoughts are spinning in and out of my empty head

So is this our new world with too many people set to explode?

Well that's what I've heard Here I am trying so hard to express myself

My eyes are wide open but my mouth is shut

So please...let me believe that you're my desire If you can, come with me

The beast cures the lover

Come with me, close your eyes

The beast cures the lover Here I am trying hard to be understood

Some say "surrender", but I've already lost

So please...let me believe that you're my desire

You're my desire
