

# Never Before

## Deep Purple

Somebody somebody come to my side  
I'm tired I'm crying I'm sick inside  
My woman that woman just wasn't right Help me now please my friend  
I never felt so bad before  
Never never before So funny so funny, just like a show  
One name two people all in a row  
Somebody somebody someone must go Help me now please my friend  
I never felt so bad before  
Never never before I was hurt when I was younger  
By a woman who was cold  
She took my name she took my body  
And she threw away my soul Can't hide can't hide my misery  
I know my sorrow it won't set me free  
She did it just see, she did it to me Help me now please my friend  
I never felt so bad before  
Never never before
