

Without You

Mest

I warned you, I told you, I'd be better without you
But you didn't care
You told me, I'd go nowhere if I didn't have you
But where are you now? I haven't seen you around, you're nowhere to be found
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up Thoughts of happiness
Only when you reminisce
'Cause now that things are bad
You think of what you could've had Think of the years they spent
With no money for the rent
From the bottom to the top
They stuck to their guns, they'll never stop Because I warned you, I told you, I'd be better without you
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up Now everyone has changed
But somehow you stayed the same
A life lesson has been learned
Your best came back and you got burned What you done you try to hide
It's time to swallow your pride
You'll never change and I can see
When you said at least you're makin' money from me But I warned you, I told you, I'd be better without you
But you didn't care
You told me, I'd go nowhere if I didn't have you
But where are you now I haven't seen you around, you're nowhere to be found
I wonder what happened to you
All the insecurities built inside of you
Must have just blown up When I wonder where you are sometimes
When I wonder where you are right now I warned you, I told you, I'd be better without you
But you didn't care
You told me, I'd go nowhere if I didn't have you
But where are you now? I haven't seen you around, you're no where to be found
I wonder what happened to you
All the insecurities built inside of you
How do you feel now? I warned you, I told you, I'd be better without you
But you didn't care
You told me, I'd go nowhere if I didn't have you
But where are you now? I haven't seen you around, you're no where to be found
I wonder what happened to you

All the insecurities built inside of you
Must have just blown up
