

Down and Out (Live and Acoustic)

Tantric

I'm coming up for air so I can
Check myself again and I stand
Proven to the man but sheltered
Confidence we tend to shelf and Unexpected hunger drives me
Just shut up and stand beside me
I don't need your understanding
I don't need to change a damn thing And though I'm used to have you here
It doesn't change the man I was
When you found me
And there was no one else around me, yeah Just turn the page and watch me grow
There's so many things that you don't know
About my soul
Live and die but this will not get old Just when you think that you're down and out
Don't preconceive what I'm all about
Look for a reason that you have to start
Acting like a friend that you are not And when you think that we played it out
We come from the bottom and knock it out
Look for a reason that you have to start
Acting like a friend but you are not, yeah Nothing in between to fall through
I'm being myself who are you
You stand above and look down
You're just a plagiaristic clown You suck the life out of me
You keep track of the pity
And when this well becomes dry
You'll shed a tear for another lie And though I'm used to have you here
It doesn't change the man I was
When you found me
And there was no one else around me, yeah Just turn the page and watch me grow
There's so many things that you don't know
About my soul
Live and die but this will not get old Just when you think that you're down and out
Don't preconceive what I'm all about
Look for a reason that you have to start
Acting like a friend that you are not And when you think that we played it out
We come from the bottom and knock it out
Look for a reason that you have to start
Acting like a friend but you are not, yeah And though I'm used to have you here
It doesn't change the man I was
When you found me

And there was no one else around me, yeah, yeah, yeah ooh
Just when you think that you're down and out
Don't preconceive what I'm all about
Look for a reason that you have to start
Acting like a friend that you are not
And when you think that we played it out
We come from the bottom and knock it out
Look for a reason that you have to start
Acting like a friend but you are not, yeah
