Beyond the Surface (feat. Aloma Steele)

Varien

My stage at hand with guardians to keep me keenest
I understand the limits of the timeless meanings
Love is made for us, for them
It keeps us sane until the end
But what lies beyond?I'm not made to cease
So perish the thought of empty visions
In this disease we're taught the rules of this life's mission
In books we've read and scriptures told
The ink is spread, it's raised in bold
But what lies beyond?Blackened into white, quiet in the night
Breathe into a life, guides me to the right places
I will not allow, settling in clouds
Drifting in the loudest of crowded spaces
Silence is gone
But what lies beyond?I'm not made to cease
So perish the thought of empty visions
In this disease we're taught the rules of this life's mission
In books we've read and scriptures told
The ink is spread, it's raised in bold
But what lies beyond?
