

If Ever

John Denver

I'd sing you a song, without a word
Still you would hear my tune
I'd give you a day, without a time
So it won't end too soonAnything, I would do
And that really is my point of view
If ever, my darling in my life
I ever had a chance to love youI'd build you a world made of the dream
That dances on your head
Take a rainbow with colours bright
To hang over your headAnything, I would do
And that really is my point of view
If ever, my darling in my life
I ever had a chance to love youFate's been waiting for the right time
To put us in each other's arms
But why should we sit and waste time
To start right now would do no harmGive me a sign and I will show you
The magic of when I speak
Open your heart, let me come in
My love is yours to keepAnything, I would do
And that really is my point of view
If ever, my darling in my life
I ever had a chance to love youIf I ever had a chance to love you
If I ever had a chance to love you
