

Fascinating

TV Eyes

Sometimes I fly so high I don't even try
It's no lie I'm in the sky
You wonder why I am still alive
But inside there's pride
I can't hide I'm not like other guys
My love is so strong
won't be long
Until you're in all my songs

We have the same friends
That's why it ends
before it can begin
Look around at all the spies
They love to criticize
and spread their little lies
Still in my dreams
you're so fascinating

Rewind: I fell flat on my face
When I say you came around
'cause you could take her place
if you only stuck around
well, it's true, look at you
Your smile
Uh, you know what to do
Those moves should be in the Louvre
Which just proves
that you're a work of art

We have the same friends
That's why it ends
before it can begin
Look around at all the spies
They love to criticize
and spread their little lies
Still in my dreams
you're so fascinating

Well sometimes I have to sigh
at how hard they try

to cut us down to size
Their words they're never true
but what can you do?
We just roll our eyes

We have the same friends
That's why it ends
before it can begin
Look around at all the spies
They love to criticize
and spread their little lies
Still in my dreams
you're so fascinating...
