

Sally

Sade

Sally, you opened out your arms to all those young men
And girl you had room for every one of them
You're the only girl on Barry and Third
Sure as hell you're the only one who cared So put your hands together for Sally
She saved all those young men
Put your hands together for Sally
She's the one who cared for them She's doing our dirty work
She's the only one who cares
Doing our dirty work
Thirsty world, one angry day in New York Take a look at Dave he was once seventeen
Zoot suit and shinny shoes, he ran around town
And threw his metholated laughter
Most of his memories drowned But he remembers what his mommy used to shout
She used to shout, one day surely son
The streets are gonna tire you out So put your hands together for Sally
She's the one who cared for him
Put your hands together for Sally
She was there when his luck was running thin She's doing our dirty work
She's the only one who cares
Doing our dirty work
Thirsty world, one angry day in New York Tommy had a wife and family
But the needle came between the love and the hard times
Thank God for Sally, she was there through the misery
Just a place to lay his head, just about better off than dead She's doing our dirty work
She's the only one who cares
Doing our dirty work
Thirsty world, one angry day Vince came up from the country
Couldn't even find himself a room
Thinking about his babies
That's further away than the moon With no money but his pride in his pocket
There's really no way he can go home
There's a picture of his woman in his locket
Most of all he doesn't want to be alone Put your hands together for Sally
She's the one who cared for him
Put your hands together for Sally
She was there when his luck was running thin She's doing our dirty work
She's the only one who cares
Doing our dirty work
Thirsty world, one angry day in New York
