

# In Orbit

## Mudville

All that I'm seeing around me  
Bright shining stars that abound me  
    Suddenly out of control  
    Rather it catches my soul  
    Don't know what's up or down  
    Somehow I feel like the clown  
    Maybe someday I will wake up  
To find that it's all really made up  
    Going in orbit with you  
    Oh yeah, that's all that I do  
    Going around to the light side

Going around to the dark side  
    Behind me a gray big nothing  
I think that we really had something  
    I don't have to fear a black hole  
    Out here I'm sure of my role  
    All that I am is weightless  
    All that I see is timeless  
    Going in orbit with you  
    Oh yeah, that's all that I do  
    Going around and around  
    I'm going in orbit with you
