

Death of the Robot

Tub Ring

There was a time when it was just you and me
Until they came and made us all obsolete This is the way the universe ends
What was once exciting soon gave
way to something new
Define a generation by the life forms that they knew It was a love affair with wayfarers and information
They are
among us the children sang
Not with a whimper but with a bang This neglect has made it all clear to me
The time has come to exit life gracefully This is the way the universe ends
Proof of life is carbon I am everything
you're not
I'll leave you to each other because you share a single god It was a love affair with travellers and
information They are among us the children sang
Not with a whimper but with a bang Death of the robot
