

Put Me Back Together

The Bear Quartet

When I walk down the street
I've been tripping on my feet
And my clothes they don't match
And my blue jeans need a patch
It's cold outside
Is there someone there tonight?
It's cold outside
Would you let me come inside and make it right?
Here, it's clear that I'm not getting better
When I fall down you put me back together
My hair isn't cool
And my lips are lined with drool
I'm a mess since you left
You can use this fool, I'm a useless tool
It's cold outside
Is there someone there tonight?
It's cold outside
Would you let me come inside and make it right?
Here, it's clear that I'm not getting better
When I fall down you put me back together
I'm alone in my room, I don't know what to do
When I fall down you put me back together
And when I daydream we're eating ice cream
It's such a nice scene but then I wake up crying
I know I've just been lying right here
It's clear that I'm not getting better
When I fall down you put me back together
Here, it's clear that I'm not getting better
When I fall down you put me back together
I'm alone in my room, I don't know what to do
When I fall down you put me back together
