Northern Light

Cider Sky

There's a northern town where my rents all paid
And an endless day where my love awaits
She's been working so hard, she's been working so hard
She's been working so hard, she's been working so hard
And she loves all my mistakes and
She loves the mess I've made and
She loves me more than heaven and
She loves me more than love and
She loves me more than life and
She loves me more than pain and

She loves me more than heaven
And I love her more than hell
And she loves me more than God
She loves me more than God, I know
She loves me more than God
And I love her all
I love her all the same
