

# Headache

## Dark Lotus

[Monoxide Child:] I hear the words are spoken  
I think my mind is broken  
I keep on steady smoken  
Hopefully I die from choken  
Know what I was just thinking  
Maybe if I keep drinking  
The voice will quit and I can escape from this demon deakin  
My lifes a living hell  
Only the voice can tell  
Oh please oh christ compell  
Lead me from this evil spell  
My body won't stop shaking  
These voices keep on making  
Me do things to people, this must just be the work of satan  
[Jamie Madrox:] They want my mind an soul this shit is way out of control  
I haven't been to sleep in weeks, i'm sweating but my body's cold  
I'm shaking like a leaf, terrified to go to sleep  
Puking from the medication my vitals signs are looking weak  
I see him in the mirror, he told me come inside  
He lives inside my head so there's no where to hide  
They want my soul to die so they can come alive  
Possess my body, so everybody can realize  
[Chorus:] They say they'll give me pain  
They say they'll give me love  
They say they'll make me bleed  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!  
They say they'll give me pain  
They say they'll give me love  
They say they'll make me bleed  
And tell me i'm above  
They take me down again  
This is my medicine  
I cut the head off the devil and I throw it at you!  
[Violent J:] I take so many zoloft  
I bleed my nose off  
I run up in a church and rip my fucking clothes off

The demon follows me right to the house of God  
But then it swallows me and takes me to the Lotus Pod  
What can I do when my brains shakes my earth quakes  
My lips crack, my skin dries up and flakes  
Sleepless, 6 days of weakness  
I pin eyelids open, with rusty paperclips

[Blaze Ya Dead Homie:]

The demons coming for me, they want to take my body  
Hands reaching up behind me suffocate the breath upon me  
They squeeze my vocal chords until I want to scream  
Call upon the dark lord please wake me from my dream  
I'm steady popin no-doze, I never want to sleep  
Mental pressure over comes the brain, the evil creeps  
Body shakes for me uncontrol I need to pop another pill  
Demons here to take my soul to late I need a refill

[Reverse Message:]Spoken are the words

In the hands of pythons

Are the magic spells

To unlock the keys to the universe

It awaits, it will be summoned

By the pedals of the lotus

The night candles clean mind and soul

Shall invoke the power

[Chorus][Shaggy 2 Dope:]I sit alone in the closet so I can hear what they saying

I'm rocking back and forth helpless will it, infest my ahhhh

My momma told me it would pass its been 17 days

The bag of the tynonel bottles don't say shit about a soul rape

Tell me what the fuck I'm supposed to do now (how)

Act how (now) go where (here) be with who listen more to me or you?

Father tell me whenever will I be back to normal (never)

I guess I'm cursed to live with this headache forever

[Anybody Killa:]I can't sleep at night

Cause all these sounds in the darkness

Wake up in a cold sweat

Body feeling heartless

Pop a couple sleeping pills to try an relax

Every time I doze off something's breathing down my back

Could it be the afterlife or just a soul living inside of me

Praying for the day to take us both out of our misery

Could it be the evil ways of past on friends?

Or maybe all the lives I took are coming back for they revenge

[Chorus]Give me pain

Give me love

Make me bleed

Take me above

Take me down  
This is my medicine  
I cut the head of the devil and I throw it at you!  
[repeats until song ends]
