

Light As A Feather

Norah Jones

While the seasons will undo your soul
Time forgives us and it takes control
We separate our things to put us back together
We're light as a feather
Heavy as the weather
If it was raining stones
Put our hands together to applaud or pray
It's like the show was over
But we're too scared to walk away
All for the better, worse for the wear

We're light as a feather
God, you and I together
Meanwhile inside me it was raining stones
You didn't know, God bless your soul
We're light as a feather
Heavy as the weather
We're light as a feather
God, you and I together
