Us Against the World

Katelyn Tarver

If the sun shuts down and decided not to shine no more
I would still have you, baby
If we see the last day and they say we gotta go to war
I'll be fighting with you, baby
Cuz I know if I'm falling, you won't let me hit the ground
If the boat is sinking, I know you won't let me drown
No matter what anyone could say
This is the only place for me
And no one could ever take that away
Nothing could come between us
If the sun shuts down and decided not to shine no more, no more
I would still have you, you, you, you, you, you, you
If we see the last day and they say we gotta go to war, to war
I'll be fighting with you, you, you, you, you
Because it's us against the world
The world, the world
You know it's us against the world
The world, the world, ohh
Now if I'm lost at sea 7 days, I'm not alone
If I'm holding you, you, you, you, you
And if it all end's; everybody in the world is gone
I'll be standing with you, baby
And if it's the last breath I take
I'll leave my kiss my with you
If there's a wall between us, baby
I know I'll break through
No matter what anyone could say
This is the only place for me
And no one could ever take that away
Nothing could come between us
If the sun shuts down and decided not to shine no more, no more
I would still have you, you, you, you, you, you, you
If we see the last day and they say we gotta go to war, to war
I'll be fighting with you, you, you, you, you
Because it's us against the world
Nothing's stronger now than you and I
Cause your love is all I got
And this ain't never gon' stop, no, whoa
There's no distance here when we're apart

Come on in from the cold, lay your head on my shoulder
Ride like a soldier, I'ma stay right here
If the sun shuts down and decided not to shine no more, no more
I would still have you, you, you, you, you
Because it's us against the world
The world, the world
You know it's us against the world
The world, the world
Because it's us against the world
The world, the world
You know it's us against the world
The world, the world
Because it's us against the world
