Watch Me Rise

Have Heart

When it's cold out, when the night is still
And you're standing alone
I'll be racing when the lights go out
And you're losing controlOh higher, higher, higher we go
And tell me, tell me are we close enough to test the sun?
...the sun.Oh, higher, higher, higher we go
And tell me, tell me the journey's only just begun
...begun.I'm still standing
I'm still coming
Even when the rest are falling
The rest are falling, the rest are falling
I'm still standing
I'm still coming
Even when the best are falling
The best are falling, the best are fallingYou say, say my name
'Cause once I get my head above the clouds,
I'm never coming down
Say, say my name
'Cause once I get my head above the clouds,
In the skies... watch me rise,
Watch you rise.I'm paranoid, I'm setting in
I'm falling form the stars again
While every part of me screams, hold on
'Cause if you can't learn to pin a new break
Oh my God, how long does it take?
Every lesson we learn took so long?
But has made us strong!I'm still standing
I'm still coming
Even when the rest are falling
The rest are falling, the rest are falling
I'm still standing
I'm still coming
Even when the best are falling
The best are falling, the best are falling.You say (say), say my name (say my name)
'Cause once I get my head above the clouds,
I'm never coming down
Say (say), say my name (say my name)
'Cause once I get my head above the clouds,
In the skies... watch me rise, watch me riseHigher, higher, higher we go,

Right into the fire we go.I'm still standing
I'm still coming
Even when the rest are falling
The rest are falling, the rest are falling
I'm still standing
I'm still coming
Even when the best are falling
The best are falling, the best are falling.You say (say), say my name (say my name)
'Cause once I get my head above the clouds,
I'm never coming down
Say (say), say my name (say my name)
'Cause once I get my head above the clouds,
In the skies... watch me rise.
