

Champions

Born Cages

I'm afraid that I've been floating
Standing still while the world keeps turning
You make me feel a fire burning deep in my bones
And I just can't help to start from making it grow
We could be better
More than we've been before
And we could be champions
We could be champions
We could be champions
I would look for the sun in a darkened hurricane
But with all the damage done
I never thought I'd ever see again
And now I feel a fire burning deep in my bones
And I just can't help to start from making it grow
We could be better
More than we've been before
And we could be champions
We could be champions
We could be champions
We could be better
More than we've been before
We could be champions
We could be champions
We could be better
More than we've been before
We could be champions
We could be champions
We could be champions
