Love Her Like Me

Elton John

You can take her
Make her change her name
You and your old money dance around the flame
But you can never, never love her like meYou can charm her
Calm her when she's wild
Show a little comfort, play with her inner child
You can never, never love her like meSo I just close my eyes and steal her away when you sleep
Sneak her in my dreams every single day of the week
You may have her in the real world but if you could only see
How we rock this room in the twilight zone
And you can never, never love her like me, yeahYou can warm her
Charm her with your style
I know you convinced her she's the love of your life
And no, you'll never, never love her like meYou can bless her
Keep her conscience clean
You can undress her, go all the places I've been
But you'll never, never love her like meSo I just close my eyes and steal her away when you sleep
Sneak her in my dreams every single day of the week
You may have her in the real world but if you could only see
How we rock this room in the twilight zone
And you can never, never love her like me, yeahSo I just close my eyes and steal her away when you sleep
Sneak her in my dreams every single day of the week
You may have her in the real world but if you could only see
How we rock this room in the twilight zone
And you can never, never, never, never, never love her like me, yeahLove her like me, yeah
Love her like me, yeah
