

# DNA

## Blackfield

DNA, welcome to my DNA  
Stupidly you wants to stay  
With my DNA  
DNA, you cannot fix what you get  
Things that I try to forget  
In my DNACan you forgive me?  
For things that I've said  
Things that I've done  
Go now and never come back  
DNA, we all got expiring dates  
Trust me there's no get away  
From my DNA  
DNA, Wires of sadness and pain  
Always remaining the same, my DNA  
Disarmed by the music, there's bombs in my head  
You'll always get burned  
Go now and never get backMy deadly venom, Soon I'll be dead  
Go now my love  
Go now and never come back  
Song Discussions is protected by U.S. Patent 9401941. Other patents pending.
