

# Seduction of Decay

## Avantasia

You'll hear me screaming your name  
I am the angel of decay to seize you  
There'll be no thoughts to maintain  
I'm the seduction of decay  
Time contaminating space to reinfect and agonize anything around  
We are metabolite of dreams the chosen ones to sacrifice the wasteland-bound  
Oh, Euphoria is looming in the darkness  
Coincidence of opposites we are  
Once beautiful intentions  
Scientist II: Oh, we'll drag you over  
Oh, it's gonna drag you over  
Aaron: Oh, from the start we run away  
And don't seem to care what for  
Forever feels just like a blink after passing by  
Just for  
Scientist II: It ain't the far cry that it seemed  
In just a wink  
we'd come for you  
You may not feel it  
We are the light, the scorching heat  
We are the untold chosen few  
And now we've come for you  
We'll fit you like a velvet glove that's gonna choke their minds  
Affiliate yourself with what you can't defy  
Some below and few above  
We're gonna numb their minds  
Scientist II: Riot on the edge  
Aaron: On the brink of insanity  
Scientist II: Riot on the edge  
You'll hear me screaming your name  
I am the angel of decay to seize you  
There'll be no thoughts to maintain  
I'm the seduction of decay  
Aaron: I hear their tales reverberate  
From shrouds of myth that only time would weave  
Bred in a den of lunacy  
Who can we trust? Who's next in line?  
The sacred drive to rationalize  
Commit ourselves another day to the lesser crime  
Scientist II: Choke on your own pace with candour  
Aaron: So pleasant in the quiet  
Vicegerents of the tide  
Scientist II: Riot on the edge  
Aaron: On the brink of insanity  
Scientist II: Riot on the edge  
ols don't know the prime's another state of decay  
Scientist II: Riot on the edge  
Aaron: On the brink of insanity  
Scientist II: Riot on the edge  
You'll hear me screaming your name  
I am the angel of decay to seize you  
There'll be no thoughts to maintain

I'm the seduction of decay
