Invention

John Tilbury

Crazy people know
The special place to go
When the pressure is on
Neurons re-align
'Til the feeling is fine
Or the trouble is gone
They're in the business
Of inventing saviorsThere's always trouble
So tell yourself again
That help is on the way
And safety abounds
That safety aboundsWhen you need some
Kind of guarantee
That you're protected
You start to trust
The things that deeper comfort brings
Before you've checked it
You might be waiting
For a long timeThere's always trouble
So tell yourself again
That help is on the way
And safety abounds
That safety abounds
You think safety abounds
You think safety abounds
