

Invention

John Tilbury

Crazy people know
The special place to go
When the pressure is on
 Neurons re-align
 'Til the feeling is fine
 Or the trouble is gone
 They're in the business
Of inventing saviorsThere's always trouble
 So tell yourself again
 That help is on the way
 And safety abounds
That safety aboundsWhen you need some
 Kind of guarantee
 That you're protected
 You start to trust
The things that deeper comfort brings
 Before you've checked it
 You might be waiting
For a long timeThere's always trouble
 So tell yourself again
 That help is on the way
 And safety abounds
 That safety abounds
You think safety abounds
You think safety abounds
