

End Of The Beginning

30 Seconds To Mars

Here we are searching for a sign
Here we are searching for a sign
 It's the end here today
But I will build a new beginning
 Take some time, find a place
And I will start my own religion
 As the day divides the night
Here we are searching for a sign
 Watch the men multiply
 See them ease out of the circle
Watch your friends run and hide
Help them fall back in this cycle
 Here we are searching
 You saw what you get
 If you take what you take
 Look in the eye of the test
 It's all because
Now there's a feeling I get
 When I look to the left
But it should never be sensed
 Our searching for a sign
 Can you feel it?
 Things are changing
 Can you see it?
Watch as the worlds colliding
Can you see it? Can you feel it?
 Watch as the worlds
 Collide into themselves
 Collide into themselves
Another time, another place
Another time, another place
Some paradigm has shunned the race
Some paradigm has shunned the race
 Searching
 You saw what you get
 If you take what you take
 Look in the eye of the test
 It's all because
Now there's a feeling I get

When I look to the left
But it should never be sensed
Our searching
You saw what you get
If you take what you take
Look in the eye of the test
It's all because
Now there's a feeling I get
When I look to the left
But it should never be sensed
Our searching for a sign
