Time Bender

Defmatch

We had had to leave dunwall in the dust and
Then head south can't be trusted
Yeah I'm too smooth no can't be busted
Think you saw a shadow but it's nothing
I'll avoid these cuffs and rough men
Call their bluff enough I dust them
Bodies in the street have their reper cussions
Watch when the locusts swarm we crush them
Doesn't matter if your pour or richer
Check the big picture taste the mixture
Shadow hands tgrab try to nab the system
Now we're headed here for a catalysm
Face in the mud done when I raise you up
I got razors blades and such
If you're alive think you made me up
Watch for the hive they don't play get cut

Better run better hide
I'll leave everybody in here paralyzed step aside
Get it done bending time
When I'm finished no one here's left alive energized
I know we can't be further from the dream
Get a gun check your sights
I'll leave everybody in paralyzed I've arrived

There's no messing round with my tech
Cause I'll put a dart in your neck check
And we're tearing armor apart get wrecked
Carved in a sec when I flex who's next? Ha
I get addicted to the action
Emily's blunt break them down to fractions
Thus empire of isles our main attraction
Freezing grains in hour glasses
I'm past it we waited a long while it's time to get down
Last round I made it start to finish, no killing
Could'nt call me villain, just chilling
Thrilling abilities, rip them into three's
Till I have an epiphany no one here will intervene
Mission complete when I get out clean

,Alright now

Better run better hide
I'll leave everybody in here paralyzed step aside
Get it done bending time
When I'm finished no one here's left alive energized
I know we can't be further from the dream
Get a gun check your sights
I'll leave everybody in paralyzed I've arrived

The streets are darker than they look
Just one taste , going to get you hooked
I'm never going back again, no

Step to the man when I shake impression
Weapon in hand when I shake your essence
Make my presents known electric shock
Get stalked then I break your neck in
Seconds precious got momentum
Vent them I spent them , no prevention
Did I forget to mention a couple inventions
High tech,high def ,new dimensions Go!

Better run better hide
I'll leave everybody in here paralyzed step aside
Get it done bending time
When I'm finished no one here's left alive energized
I know we can't be further from the dream
Get a gun check your sights
I'll leave everybody in paralyzed I've arrived

The streets are darker than they look
Just one taste , going to get you hooked
I'm never going back again, no
