Electric Demons In Love

Electric Six

I got so much love, I don't know where to put it
I feel so good, I don't know what to do
And I don't mind the forces of evil
If they bring me closer to you, sugar
My baby's in the kitchen and she's fixin' up supper
She drank all the wine and now she's drinkin' some more
She's cuttin' up the chicken and she's dancin' 'round the fire
She shuffles her feet on the linoleum floor
She says, "We're starting a fire, electric demons in love"
Oh my, we're starting a fire, electric demons in love
Oh my
I went down to the banks of the river
I went down and I went for a swim
I went down and then she pushed me under
And I can't remember where I'd been, no
Now I ain't educated but I sure ain't stupid
And I know what is wrong and I know what is right
Don't give your religion or your U.S. government
I met my baby in the darkness of the night
I said, "I met my baby in the darkness of the night"
I met my baby in the darkness of the night
Blood on her dress and feathers from a dove
She said, "You can't believe everything you see"
Yeah, we're starting a fire, electric demons in love
And we're starting a fire, electric demons in love
And we're starting a fire, electric demons in love
And we're starting a fire, electric demons in love
And we're starting a fire in love
