Everybody Here is a Cloud

Cloud Cult

Everybody here is a cloud
And everybody here will evaporate
You came up from the ground
From a million little pieces
Have you found where your place is?
Have you found where your place is?

You've been spending your time
Thinking about why you think so much
If there was ever a time
Now would be the time to see your time here is limited

And everybody here is a crowd
We all walk around with a million faces
Somebody turn the lights out
There's so much more to see in the darkest places
In the darkest places
In the darkest places

Certainly, certainly, certainly, certainly so
So, so, so, so
It's certainly, certainly, certainly, certainly so
So, so, so, so

And everybody here is a cloud
And everybody here will evaporate
You came up from the ground
From a million little pieces
Have you found where your place is?
Have you found where your place is?

And everybody here is waiting for the next creation
The say go, go, go, go
And everybody here is waiting for the next creation
The say go, go, go, go

And everybody here is a crowd
We each walk around with a million faces
You came up from the ground
From a million little pieces

Have you found where your place is?
Have you found where your place is?
