Soopa Doopa

Esham

I'm used to driving Benzes and Porches and Corvettes
You might see me in LA on Sunset
Or in Nevada, betting, three-digit degrees, not sweatin
Wearing leather, super fly, light as a feather,
Esham, Louie Vaton
Guns like megatron
Wont stop my reign on the world 'til armeggedon come
Underground phenemenon
I wrote the Necronomicon
You's an autobot, I'm a decepticon
Never steppin without my weapon son, the Smith n Wesson
Teach you a lesson son
In the blackout I was gone and knowin' where the pressures on
Don't sleep till dawn
All those who doze, wake up with your shit gone
Emergency, emergency, Dr. Evil, brain surgery
Go to court in the trial took the stand, commited purgery
Kavorkian, King the scorpian
Killed em all, but some still choose to plot on my downfall
I'm a mo-onster, I'm a co-onquer
Suicidalist, murder be my sponser
How you gonna reason with a psycho
I might go blaow when the gat sparks glow like tycoKill all heros (kill all heros)
Easily (easily)
Who is Super Villains? (who is super villains?)I'm used to having money and product and narcotics
Bitches on my dick still begging me for dollars
Hollar hollar if you heard me from Detroit to the dirty
We fly like a birdy, hummers spinning thirties
Tony montana, esham bandana
Body-snatcher, running through your mind like Scanners
Original murder planners, the villains they never ran us
I do it like a pimp like Little Flip and David Banna
Supersonic, byonic, electronic, to smoking chronic
Fuck the world, as I twirl, as I sip another tonic
Super wickid shit I spit, i make my victim wanna vomit
SOOPA DOOPA!
Super labratory, spitting on a super microphone
Super
