Scabies

Lafee

Friends forever you and I
We trust each other with our lives
All the way through thick and thin from day one until the end
You're like a sister to me
We fit each other to a tee
And everytime when things got rough I was there to pick you up
And then you went ahead and took away my man
I can't believe you did
I just can't understand
You even have the nerve to ask "hey girl, what's up?"
You know what: I'm gonna fuck you up!I wish you would have scabies
I wish you had a nail right through your head
The way you tried to play me you deserve no other way
I wish you would have scabies
I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
I wish you would have scabiesYou were my one and only man but you had to get inside her pants
Why can't you just go away
I hate your guts, I hate your face
Funny, I still hear you say "I'm yours forever and a day"
Oh yeah? Then how come I just saw you stick your tongue right down her throat?
You had to go ahead and bone my best friend
I can't believe you did
I just can't understand
You even have the nerve to ask "hey girl, what's up?"
You know what: I'm gonna fuck you up!I wish you would have scabies
I wish you had a nail right through your head
The way you tried to play me you deserve no other way
I wish you would have scabies
I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
I wish you would have scabiesI wish you would have scabies
I wish you had a nail right through your head
The way you tried to play me you deserve no other way
I wish you would have scabies
I wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
I wish you would have scabiesI wish your dirty ass would rot in hell
The way you tried to play me I am gonna make you pay
