

Cultural Genetics

Frameshift

[Music: Pauly/LaBrie]

[Lyrics: Pauly]Learn to teach

And teach to learn

Open your eyes

Knowledge returnsPass on the word

The modern virus

Spread it through the crowd

Watch it growYour mother taught you

How to sing a song

Your father showed you

How to tie a knotWill you teach your kids

In the same way

Coming generations

Will they play this gameWhat makes us different

Like no other

Is that we can listen

Learn from our father

Mistakes that were made

We don't have to repeat

We've been given a choice

If we care to believeEvery single teacher

Has been taught herself

She takes this information

And feeds the new machineOnce there were wise men

Who told a story

Current tales spread on a web

And rumours fuel the pagesWhat makes us different

Like no other

Is that we can listen

Learn from our father

Mistakes that were made

We don't have to repeat

We've been given a choice

If we care to believeWhat makes us different

Like no other

Is that we can listen

Learn from our father

Mistakes that were made

We don't have to repeat

We've been given a choice
If we care to believe
