Together (Film Version)

Paris Warner

Drove for miles up this dusty road
I felt so lost and on my own
With you, with you
Life has had me up a creek
but I've been up here this entire week
With you, with you
And I'm feeling a little better
And I think it comes down to a few small letters
T-O-G to the E to the T and then you add on HER
and that's together
T-O-G to the E to the T and then you add on HER
and we're together
Together keeps the bears faraway off in their lairs
Together we are dry in the rain
Together here we are underneath the sky of stars
Together we share joy and pain
T-O-G to the E to the T and then you add on HER
and that's together
T-O-G to the E to the T and then you add on HER
and we're together
