Anywhere

Stroke 9

Everyday something new comes my way And helps me get through the past Anyway, I can't say how long I've been away But I feel at home at last I'm aware there's something around me Saving me, protecting me That won't let me crash Everyday something new comes my way And I feel at home at lastAnywhere is everywhere and I don't care As long as I can feel this is real I'm not scared to let you in Everywhere is far from there and I don't care as long as this is real When you're gone then I won't feel this good again. Anytime I can't say what's on my mind And remember how good things have been I relax and reattach to the past And we feel like one again It erases all the care in our way And we feel like one againFeel this good again
