

# All Fours

## Wire

Sensitivity levels, confusion limits  
The density of unresolved ideas  
In the field of view, energy emits  
A fluxus level ride of evolution Rethinking strategies  
Terror forms in liquid slums  
Dictators' ships supplied at all costs  
Sulphur spots and rising tides  
Fetid chancellors of taste  
Lowest counts since moonman walked on all fours  
Understanding formation and evolution  
Starburst galaxies and population  
Energy budgets of luminosity  
Occurring daily to gauge determination
