

YOU CAN'T STOP

Gianluca Luisi

I'd been thinking how to tell you off
Why do you forget everything I say?
How can I always find the time to spend with you
While you focus everything on me? This time, don't close your eyes
And take your time, it's your time Been thinking of this for too long
Who knows what to say now?
If this is getting over him from now on
Honestly, you're not, honestly you're You call and ask for me the time it's almost two
You think you'd just look at your watch
Why can't you forget everything you thought you knew?
And stop pretending it's the truth This time, don't close your eyes
And take your time, it's your time Been thinking of this for too long
Who knows what to say now?
If this is getting over him from now on
Well honestly, you're not, honestly you're
Focus, focus, focus This time, don't close your eyes
And take your time, it's your time Hey hey, you know what to say now
This is getting over him from now on You can't stop it, no no, you can't stop me
You can't stop it, no no, you can't stop me
You can't, you won't stop me, stop it now
