Party Crashers

Nasty Army

Well, I see you around town
You got no time for dressing down
The day's headlines, all suit you fine, oh
You make your way right through the crowdInvisible eyes are everywhere
You check your coat, they check your hair
You new line fashion and you put on passion
Don't seem to get you anywhereWell all the party crashers
And all the party crashers
And all the party crashers, yeah
They send a message across this townThe DJ is in from overseas
You're breaking hearts, he's making beats
Your hands are shaking as you hit the pavement
Can't catch a break on 13th streetAnd I say, "These days things seems strange"
Oh now, these days things seems strange
They're taking over while we think it over
Can't get a message anywayTo all the party crashers
And all the party crashers
And all the party crashers, yeah
They send a message across the town, wohAnd all the party crashers
Yeah all the party crashers
And all the party crashers
Well all the party crashersWell, they let me down down down down down
They let me down down down down down
They let me down down down down down
They let me down down down down down
They let me down
