

Faces

Wolfskin

Crawling through the wind and sand

We are all born

In the same land

With different laws

we became gods, of our small universes

Inside our souls. When there is nowhere to go...

Where will you be?

What will you believe? Now, that we are far away

And there is no return (No return)

I've lost my faith and my hope (And my Hope)

Now that we are far away, and there is no return!

Faces is all I see but intentions lay behind the skin! So I look at the sky searching for a signal to Survive

We will pay the price with blood Cursed Existence! When there is nowhere to go...

Where will you be?

What will you believe? Now, we are far away

And there is no return (No return)

I've lost my faith and my hope (And my Hope)

Now that we are far away, and there is no return!

Faces is all I see but intentions lay behind the skin! You have to see

you are on the edge

show your real face to the world

Your real face! Faces is all I see

Faces is all I see

Faces is all i see but intentions

lay behind the skin.
