

My Paradise

The Outfield

Think I might get lucky tonight
Let my hair down get a little crazy, yeah
My reflection's doing alright
It don't take nothing to introduce suggestionEverybody's got one thing on their mind
A set of wheels and a cranked up radio
In this town there might be nowhere to hide
In this town there might be nowhere to go 'causeOn my left to my right
Oh this is my paradise
You can call it what you like
I know this is my paradiseI might get lucky again
I got a deal and I know won't break me yeah
If I can afford what money can't buy
There's nothing better than a small town ladyI'm no different to the boy next door
A good time's the same for everyone
I don't need another chance to be sure
Since the day I was born I've always felt secure, 'causeOn my left to my right
Oh this is my paradise
You can call it what you like
I know this is my paradiseReputation's got a price of its own
And not too many people want to pay for it
Everybody needs a place to come from
Everybody needs a place where they belongEverybody know this is my paradise
Everybody know this is my paradiseOn my left to my right
Oh this is my paradise
You can call it what you like
I know this is my paradiseOn my left to my right
Oh this is my paradise
You can call it what you like
I know this is my paradiseEverybody know this is my paradise
Everybody know this is my paradise
Everybody know, every
