

Elephant Bell

Monster Magnet

Move over little insect
It's time for you to go
I don't wanna have to tell you twice You come to me tomorrow
Saying you found my head in the fields
I couldn't swear that it's mine
Been talkin' to the bottle
And it roars out how I feel
There's nothin', nothin' here There's a doorway and a fuel pump
The taste of another mind
You can bake me in your cancer
You can cook me in your spoon
Put a bowl in my heart now
Don't know who you're prayin' to? Ain't gonna stand in the rocket's shadow
My Mama's waitin' for me on the moon
My dick just got a million times bigger
I'll be pumpin' Andromeda soon
Rise boy, rise boy
Rise boy, rise, bring it on
