We All Fall Down

Kate Alexa

I know it doesn't go the way u want
Sometimes you almost get to feel it
but then its gone
I know your looking for the shadows on the wall
its like you disappear, you feel so smallI'm here, your there
I feel what your going thru
Cause I, I been there
exactly where u areChorus:
Cuz we all fall down
We are all so beautifully imperfect
What's lost is found
And in the end, its always worth it
are you gonna walk away, maybe this could be the day
it turns around cuz we all fall down
we all fall downits gonna be okay
the sun is reaching thru the clouds behind the rain
hold on, in a moment all of it can change
you think you messed it up & your to blame
for it, for everything, its time to let it goChorusits gonna be okay, we all make mistakes
we do what we can, just to find our way
i'll be here for you, u will make it thru
gonna make it thruWe all fall down
whats lost is foundChoruswe all fall down
we all fall down
