One Foot In Front Of The Other

Emilie Autumn

Well, love can be an uphill climb
I'm gonna meet a lot of resistance
It takes every ounce of strength we've got
If we're gonna go the distanceWe can get discouraged and lose our courage
Worrying 'bout the daily grind
But life's a journey, no need to hurry
It's one day at a timeOne foot in front of the other
Take one step and then take another
Keep on walkin', we're headed in the right directionPuttin' one foot in front of the other
Little by little gets a whole lot further
Hittin' our stride, one foot in front of the otherWhat's down the road, we can't say
And the road behind don't matter
But every mile along the way
Is just another mile togetherUnconcerned about the twists and turns
We're takin' it nice and slow
Safe and sound, covering ground
Steady as she goesOne foot in front of the other
Take one step and then take another
Just keep on walkin', we're heading in the right directionPuttin' one foot in front of the other
Little by little gets a whole lot further
Hittin' our stride, one foot in front of the otherYesterday is dead and gone
Tomorrow takes care of itself
We'll just keep on keepin' on
'Cause we ain't stumbled yetOne foot in front of the other
Take one step and then take another
Just a-walkin' and a-talkin' and a-movin' in the same directionJust puttin' one foot in front of the other
Little by little gets a whole lot further
Hittin' our stride, one foot in front of the other
Well, just a-hittin' our stride, one foot in front of the other
