White Dress

Christophe Beck

So do you remember?
With your white dress on
It was the end of December
Count the days till dawn
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
I never knew
She's coming on Friday
And then the close spark
Cause its just minutes & highways
Till the one I love
The one I love
Till oh...
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone

The way that I love you
I never knew
That I could love someone
The way that I love you
I never knew
I never knew
I never knew
That I could love someone
The way that I love you
I never knew
That I could love someone
The way that I love you

I never knew
That I could love someone
The way that I love you
I never knew
I never knew, no
I never knew, no
I never knew
That I could love
That I could love
That I could love someone
That you could love
That you could love someone like me
Oh, that I could love
That I could love
That I could love someone like
That you could love someone like me
