I Came 2 Party

Cinema Bizarre

I came to party and you came to party
So why don't we party together
I came to party and you came to party
So why don't we party together
We roll up like no one can do it, baby
It's lights out, turn the fucking system up
It's one night rolling through your town tonight
So stand up, space and Cinema Bizarre
So get up, nod your head and tell me
It's what's up, it's getting hot and heavy
The phone's on, take a picture we don't care
So get up, let me hear you sing it out
I came to party and you came to party
So why don't we party together
I came to party and you came to party
So why don't we party together
We all stars, you and me and her together
We go hard, we don't give a fuck whatever
It's one night, throw your fucking cameras up
And let's go, it's cherry boom and red one
So get up, nod your head and tell me
It's what's up, it's getting hot and heavy
The phone's on take a picture we don't care
And if you got one, put your drink up in the air air air
I came to party and you came to party
So why don't we party together
I came to party and you came to party
So why don't we party together
Doesn't matter anyway, know that we can't stay
Know you had a boyfriend anyway
Got my picture on your phone when you're all alone
Know we got to go, let me hear you sing it out
I came to party and you came to party
So why don't we party together
I came to party and you came to party
So why don't we party together
