Angel

Pure Prairie League

There's a silver moon in the midnight sky
And lovers are heart to heart
But love is a shadow
Lost in your eyes
And time has taken us apart
But it's so far away and so long ago
It's still so strong I want you to knowYou're still right here in my heart
Where you've been right from the start
Still right here in my heart oh babyThere's a hollow sound in this empty room
Echoes in the dark
I wish I could wake and find you here
Give us another chance to start
But night after night day after day
I love you so much I still have to sayYou're still right here in my heart
Where you've been right from the start
Still right here in my heart oh babyWell I wonder what you're feelin'
Do you ever feel the same
When you listen to your heart
Do you ever hear my nameYou're still right here in my heart
Where you've been right from the start
Still right here in my heart oh baby
